- Colours other than those shown are available on request by specifying a British Standard or RAL reference. Please submit details for price and availability.
- All colours should be sampled and approved prior to placing an order.
- Ceramic panels are painted on one side only which is fired permanently onto the glass during the toughening process.
- Standard Glass thickness 6mm, also available in 8mm and 10mm.
- The colour is assessed by viewing the ceramic paint through 6mm clear float glass. The above colours are the closest representation achievable in printed format. Always refer to samples for actual colour.
